**SecTek Introduces IES's Milo Range Pro®**

October 19, 2009, RESTON, VA – SecTek, Inc. announces the deployment of IES's MILO Range Pro®, a leading edge computer-based firearms training system into our training academy's arsenal of training aids.

MILO Range Pro® offers our security officers, law enforcement officers and supervisors the most advanced feature set available for interactive Use of Force and Firearms training. The MILO Range Pro® provides hundreds of ready-to-train scenarios, and an extensive library of interactive graphics-based firearms drills and exercises. These scenarios and extensive library help prepare our officers and supervisors with the judgmental skills needed to make immediate real-time assessment in shoot/don't shoot situations. The system also provides our officers and supervisors the necessary basic firearms handling, control, and safety training needed to ensure optimum safe firearms practices. The system is also utilized as part of our in-house training program that comprehensively supports our clients' requirements.

MILO Range Pro® includes low light training, dry fire and recoil training, trainee action capture, baton training, Taser, OC and less-than-lethal projectile weapons training scenarios. Our training staff has worked hand-in-hand with IES staff to incorporate scenarios specific to our contract sites and our clients' firearms training requirements. Our officers and supervisors have the opportunity to stop in at our training academy at any time and utilize the system to sharpen their skills.

"These are the type of enhancements that identify the proactive protective service providers who are truly professionals in the business. We take great pride in our training academy, our cadre of instructors and their ability to bring innovation and modernization to our training processes. This added technology will assist us in providing our customers with the peace of mind they deserve in knowing that their security provider's training programs are at the zenith of the industry", said Wilfred Blood, President/CEO of SecTek, Inc.
